Project

● Portfolio Website

Create an engaging and interactive portfolio website using Html,Css & Javascript to showcase my skills, projects, and experiences effectively. The portfolio will serve as a comprehensive representation of my expertise in frontend development, with the aim of demonstrating creativity, technical proficiency, and a strong attention to detail.

● React (Amazon Website-Clone)

Amazon Clone Project using React.js: then created Backend api using Node.js for this project with help of some node js packages.Used Mango db database to store some Products details example: Name,Price,Stock,Images etc.. Leveraged React components, Hooks, and Router for intuitive user interfaces and responsive design, ensuring accessibility across devices. Demonstrated expertise in React.js while prioritizing functionality
